- Seamless integration with many inventory and accounting systems
- Cocktail recipes can be displayed or printed
- Supports handheld terminals
- Flexible options for customer check out including item splitting
- “Mix n’Match” and multi buying discounting
- Data analysis with BI tools
- Time attendance registration

Centara is one of the fastest point-of-sale systems on the market. Lower total cost of ownership and improved productivity are the main elements to look forward to when setting up Centara.

Flexible on-screen menus and tailor-made manager functions along with extensive reporting abilities and reliability, give Centara the leading edge managers are searching for when choosing a system.

Intuitive design and user interface cuts down training time enabling managers to make the most of the system and allows for effortless sales, adding items or adjusting prices.

The system operates on most known POS hardware and easily communicates with other software.

FAST AND EFFICIENT

One of the most important design principles of Centara solutions is increased transaction speed and reduced customer waiting time.

The highly flexible and customizable interface allows tailoring the menus on the screen to each and every restaurant's requirement. That ensures minimum transaction time as well as decreased training costs.

Centara offers a multitude of other features that are essential for fast service: Quick sign-in, fast access to all sales, easy tendering and adaptable menus.

ENCOURAGES REPEAT BUSINESS

Discounts and/or promotions such as “Happy-hour” specials, can easily be created in Centara based on each restaurant’s desire. Centara has advanced capabilities for complex discounting in line with local VAT regulations. This enables restaurants to construct offers such as combination meals or other “Mix n’Match” offers to name a few.

COMPANY “LOOK AND FEEL”

The design with flexible on-screen menus and different start-up menus for different locations or waiters, can easily be tailored to suit the requirements of each operation.

Centara allows staff at busy establishments to provide efficient service by suspending the sale at one terminal and retrieving it at another thus increasing their flexibility and speed of service.

REPORTS FOR ANALYSIS AND PLANNING

Centara offers a number of options when it comes to viewing and analyzing sales data. Standard reports show the key performance indicators such as the most popular sales items, profit margins, discounts and promotions, etc.

Reports can be collected from various locations and sent to headquarters. This can be done daily or more frequently.

Superior performance – all the time

Centara has built-in redundancy features that allows staff to keep serving customers even if other connected systems go offline.

Centara is based on Microsoft SQL and .NET technologies and is certified ARTS data model conformant. The technology platform guarantees a reliable and proven architecture.

KITCHEN DISPLAY SYSTEM

Centara’s kitchen display system gives the managers the opportunity to control the preparation displays with varying staff and menus throughout the day.

Centara also supports multiple kitchen printers and kitchen bump-bars are available.

In order to increase control and efficiency Centara can be connected to kitchen video systems and other systems such as camera surveillance systems.
