

Centara is one of the fastest point-of-sale systems on the market. Lower total cost of ownership and improved productivity are the main elements to look forward to when setting up Centara.

Flexible on-screen menus and tailor-made manager functions along with extensive reporting abilities and reliability, give Centara the leading edge managers are searching for when choosing a system.

Intuitive design and user interface cuts down training time enabling managers to make the most of the system and allows for effortless sales, adding items or adjusting prices.

The system operates on most known POS hardware and easily communicates with other software.

SUPERMARKET

Centara enables supermarkets to handle any number of customers quickly and efficiently. By shortening transaction time, the system increases throughput, and guarantees a rise in revenue as well as the level of service. Hundreds of supermarkets, food and grocery stores on three continents use Centara to improve their businesses.

- Fraud management
- Multiple currencies
- Seamless integration with many inventory and accounting systems
- Data analysis with BI tools
- Supports handheld terminals
- Supports loyalty plans and redeems gift cards
- Time attendance registration
- Easy to use

FAST AND EASY TO USE

One of the most important features of any retail system in a supermarket is operating speed. With low transaction time the system allows cashiers to quickly scan, weigh and search all articles in the store, and thus serve customers faster and with fewer errors.

Centara easily connects to all peripheral equipment, be it barcode scanners, scales or printers. The system's weighing module comes with an EU certification according to EN 45501 standard.

Quick sign-in is available with various methods such as secure sign-in with PIN number, sign-in with one keystroke, sign-in with special hardware, scanned sign-in or swipe card sign-in.

The data compilation of Centara offers a vast field of information for further analysis or study with standardized business intelligence tools.

Standard BI tools allow for even more comprehensive reports for sales accounting, determining the best and worst sales items, breakdown of sales or other parameters in reference to time-periods, staff and POS comparison.

Supermarket chains can also collate reports from various locations and send to headquarters. This can be done daily or more frequently.

PRECISE AND FLEXIBLE APPLICATIONS

The highly flexible and customizable interface of Centara ensures minimum transaction time as well as decreased training costs. Centara gives the opportunity to tailor the system around an operation with operator- or location specific menus and sales options, flexible manager functions and menus to maximize the efficiency of the operations.

Visual and functional POS profiles, user interface layouts and employee permissions can all be managed centrally.

DISCOUNTS AND SPECIAL OFFERS

Centara offers all main discount and special offer solutions and can also easily be tailored to special needs. Weekly specials, "Two for one", rewards for "quantity bought" or "amount spent" etc. can all be turned on or off with the discount/offer module.

Supermarket chains can control all offers and discounts from a centralized base.

REPORTS FOR ANALYSIS AND PLANNING

Centara offers a number of options when it comes to viewing and analyzing sales data. Standard reports show the key performance indicators such as the most popular sales items, profit margins, discounts and promotions, etc.

SECURE AND RELIABLE

Centara has built-in redundancy features that allows staff to keep handling customers even if other connected systems go offline.

Centara is based on Microsoft SQL and .NET technologies and is certified ARTS data model conformant. The technology platform guarantees a reliable and proven architecture.
